# NOTIFICATION

Ride Manufacturer: Majestic Manufacturing	Affected Production Dates: All Production
Ride Name: SCOOTER / Viper Bumper Cars	Affected Serial Nos.: All Serial Nos.
Model Number: All Models / Viper Bumper Car	

**Abstract of Issue:**

This notification is to notify the owners about using the correct bumper tire pressure of a maximum of 16 P.S.I. for the Viper bumper cars.

**Reason For Release:**

Inflating the bumper tire pressure to maximum of 16 P.S.I. for the Viper bumper cars will insure adequate separation between bumper cars when impacting each other.

**Action To Be Taken: (Inspection, Modification, Replacement, NDT, Order Parts, Manual Revision, Procedural Change, etc.)**

All Viper bumper cars should be inspected prior to operation and properly inflated to a maximum tire pressure of 16 P.S.I.

For longevity of new or used tires, talc the tires prior to each operation for the first month to insure that the tire operates with sufficient lubrication. Then each month thereafter, apply the talc 3 times per week.

**Detail Of Issue:**  
 (Text/Drawings/Schematics)
